Writing (максимум 40 баллов)

Many families worldwide have elder people, but sometimes they have to live on their own. I think no matter what they should be taken care of.

Sometime elder person cannot live with anyone. Those people have weak health, so life seems unpleasant to them. This is why people should take care of them. Even big companies aware of this problem. As ~~ex~~ an example, to make it easier to track their health, there is a new monitoring technology developed by Fujitsu. It puts family members or security firms aware by giving all information they need. A great technology that could save many lives so it's amazing.

In conclusion, elder people are ones who's in high risk zone, so people should be taking care of their health. New technologies also being developed for this purpose.
